The HH5 is the most compact HydroHulls and the perfect...

The HH5 is the most compact HydroHulls and the perfect boat for those who want to stay mobile: 4.80 m long, weighing around 350 kg, and easily transported to the water and stored anywhere with its trailer. Five separate air chambers and tubes made of Hypalon neoprene ensure safety, while the GRP hull provides a smooth ride even in waves. A 50 hp outboard motor is recommended, but up to 70 hp is permitted – with this, the HH5 reaches speeds of around 35 knots. On board, there's room for 5+1 people, 60 liters of fuel, and 40 liters of fresh water. CE Design Category C.
