AT A GLANCE

Six meters long, around 550 kg empty weight, and room...

Six meters long, around 550 kg empty weight, and room for seven people: the HH6 is the all-rounder in the HydroHulls range – large enough for a day on the lake with the family, yet manageable enough for a standard mooring. It features six separate air chambers, Hypalon neoprene tubes, and a GRP hull. A 100 hp engine is recommended, with a maximum permissible engine size of 140 hp; this allows for speeds of around 45 knots. It carries 140 liters of fuel and 50 liters of fresh water. CE Design Category C.
