AT A GLANCE

Avator is Mercury's electric line: emission-free, very quiet, and with...

Avator is Mercury's electric line: emission-free, very quiet, and with a swappable battery – especially interesting for waters with combustion engine restrictions.

11,000 W of power at the propeller shaft (12.8 kW input power, 48 V), transverse flux electric motor. Drive weight approximately 56.2 kg, LiFePO₄ battery with 5376 Wh (approximately 42.2 kg). Shaft lengths of 20 and 25 inches, remote control only. Mercury does not specify a horsepower equivalent for this model.

The horsepower equivalent listed by Mercury in the catalog is used instead.

DESCRIPTION (CONTINUED)

We professionally install and commission the motor. Price upon request – we would be happy to provide you with a quote including battery, charger, and installation.
