The jet models operate with jet propulsion instead of a propeller and are therefore designed for shallow, rocky water. The specified power output is the output at the jet pump.

The FourStroke Jet 105 hp delivers 105 hp from a 4-cylinder in-line engine with a 3,000 cc displacement. Dry weight from 218 kg. Alternator 60 A.

We professionally install, commission, and break in the engine. Price upon request – we would be happy to provide you with a quote including propeller, instrumentation, and installation.
